

What to do after a CRASH

1. **Call the police.** They should generate an IL Motorist Report for any crash in which there is an injury, death or property damage over \$500.
2. **Get car, driver, owner and insurance information.** Sometimes the driver is not the owner.
3. **Get witness information.** You should not depend on the police to get this information. When it's driver's word against yours, an independent witness is of paramount importance.
4. **Seek medical attention.** If there is even the slightest chance of injury, request an ambulance and go to the ER. When your adrenaline is flowing, you may not feel any injuries. From a legal standpoint, an ER visit can document injuries from a crash.
5. **Preserve evidence.** Your bicycle, clothing, helmet and anything damaged are evidence and should be saved.
6. **Take pictures.** If you have visible damage to your stuff and/or your body, document it.
